

Jason Paroff, Chair, ByLaws

Jason Paroff is a Senior Director and Practice Lead of the forensics practice for the combined DTI/Epiq Company. In this capacity Mr. Paroff leads the US forensics and data collections practice and coordinates resources and service on a global basis. In addition to his management role, Mr. Paroff has examined numerous computers and computer systems for evidence of fraud, theft of trade secrets, harassment, and other improper civil and criminal conduct. He has testified in federal district court as an expert witness and has been a conference presenter, and a guest lecturer at Columbia University's School of Business. Mr. Paroff has also taught computer forensics to Fortune 500 corporations, attorneys and members of foreign police and intelligence agencies.

Previous Professional Experience

Prior to joining Epiq Systems, Mr. Paroff worked as a prosecutor for six years in the Rockland County District Attorney's Office in New York, and spent nearly 15 years building and running the computer forensics operations for a large consulting and data recovery firm. The majority of Mr. Paroff's career has been dedicated to investigating and prosecuting white-collar crime, computer crime, and civil asset forfeiture cases as well as conducting computer forensics and running large-scale computer forensics operations.

During his tenure with the District Attorney's office, Mr. Paroff headed the asset forfeiture section and supervised major criminal and civil investigations involving insurance, bank, consumer, credit card, and other frauds. Mr. Paroff was actively involved in the seizure and subsequent search of many computers and also sat on the County of Rockland's Computer Network Committee.
